

1. Le vocabulaire officiel du texte & de l'exercice

TOP PRIORITÉ

Terme anglais	Traduction	Exemple d'utilisation	Synonymes
Readings <i>n. pl.</i>	Relevés, mesures	<i>The sensors took temperature readings every ten minutes throughout the experiment.</i>	<i>Measurements, data points, records, figures</i>
Involvement <i>n.</i>	Implication, participation	<i>The success of the project relies on the active involvement of local communities.</i>	<i>Participation, engagement, collaboration</i>
To coin <i>(a term / phrase)</i>	Forger, inventer (un mot)	<i>Alan Turing helped coin several key concepts in modern computing.</i>	<i>To devise, to invent, to originate, to formulate</i>
The spread <i>n.</i>	La propagation, la diffusion	<i>Epidemiologists used statistical models to forecast the spread of the disease.</i>	<i>Dissemination, propagation, expansion, distribution</i>
A thirst for <i>(data / knowledge)</i>	Une soif de (données)	<i>Driven by a thirst for data, data scientists turned to open-source archives.</i>	<i>A craving for, an eagerness for, a strong appetite for</i>
Connectedness <i>n.</i>	Connectivité, lien social	<i>Digital platforms foster a sense of connectedness among dispersed volunteers.</i>	<i>Interconnection, cohesion, interrelatedness</i>
Proponents <i>n. pl.</i>	Partisans, adeptes	<i>Proponents of open science argue that sharing raw datasets accelerates discovery.</i>	<i>Advocates, supporters, champions, defenders</i>
To track <i>v.</i>	Suivre, pister	<i>Satellites are deployed to track deforestation in the Amazon basin.</i>	<i>To monitor, to trace, to follow, to keep track of</i>
Lay people / Layman <i>n.</i>	Profanes, non-spécialistes	<i>The report was summarized so that lay people could easily interpret the results.</i>	<i>Amateurs, non-experts, the general public, novices</i>
Boundaries <i>n. pl.</i>	Frontières, limites	<i>This study pushes beyond the traditional boundaries of social and computer science.</i>	<i>Limits, borders, frontiers, thresholds</i>
Flaws <i>n. pl.</i>	Faillies, défauts	<i>The peer-review process revealed major methodological flaws in the sampling design.</i>	<i>Shortcomings, defects, deficiencies, imperfections</i>

Terme anglais	Traduction	Exemple (suite)	Synonymes
Meanwhile <i>adv.</i>	Pendant ce temps, entre-temps	<i>The team analyzed the survey; meanwhile, volunteers gathered additional samples.</i>	<i>In the meantime, simultaneously, concurrently</i>
Feasible <i>adj.</i>	Faisable, réalisable	<i>Given the current budget and computing power, implementing this algorithm is feasible.</i>	<i>Viable, achievable, realistic, workable</i>

2. Sciences participatives & Recherche (Citizen Science)

Stewardship (n.)

Intendance, gestion responsable

EX. *Environmental **stewardship** requires sustained collaboration between citizens and policymakers.*

SYN. *environmental management, responsible supervision, custodianship*

Crowdsourcing (n.)

Production participative

EX. *The research lab used **crowdsourcing** to classify over one million galaxy images online.*

SYN. *distributed problem-solving, mass collaboration*

To compile (v.)

Compiler, rassembler des données

EX. *The student spent two weeks **compiling** socio-demographic records into a clean spreadsheet.*

SYN. *to collect, to gather, to assemble*

To map out (v.)

Cartographier, répertorier

EX. *GPS data allowed researchers **to map out** heat islands in densely populated urban districts.*

SYN. *to delineate, to plot, to chart*

To monitor (v.)

Surveiller, contrôler dans le temps

EX. *Sensors were placed along the estuary **to monitor** salinity levels twice daily.*

SYN. *to keep track of, to oversee, to observe*

At a large / small scale (expr.)

À grande / petite échelle

EX. *Testing the predictive model **at a large scale** exposed several algorithmic bottlenecks.*

SYN. *on a large scope, broadly / narrowly*

To enlist (v.)

Enrôler, mobiliser des volontaires

EX. *The campaign **enlisted** thousands of birdwatchers across Europe to census migratory flocks.*

SYN. *to recruit, to engage, to mobilize*

To uphold (v. — research / standards)**Maintenir, préserver, soutenir**EX. *Strict validation procedures are crucial **to uphold** scientific rigor in participatory projects.*SYN. *to maintain, to sustain, to endorse***To further** (v. — science)**Faire progresser, développer**EX. *Publicly sharing raw field measurements helped **to further** ecological knowledge significantly.*SYN. *to advance, to promote, to enhance***A means** (n. sing. ou plur.)**Un moyen**EX. *Smartphone apps are **a means** to collect widespread field data at a fraction of the usual cost.*SYN. *a method, a vehicle, a way* **Note** : s'écrit toujours avec un « s ».**Disclosed / To disclose** (adj. / v.)**Divulgué, révélé / Révéler**EX. *The ministry **disclosed** the anonymized healthcare survey results to university laboratories.*SYN. *revealed, uncovered, made public* ≠ *concealed***Misused data** (n.)**Données détournées ou mal exploitées**EX. *Without proper variable normalization, **misused data** produces skewed statistical regressions.*SYN. *mishandled, manipulated, abused data*

3. Écologie, Biodiversité & Environnement

Flagship (adj. / n. — program / species)**Projet phare, emblématique**EX. *The monarch butterfly has become the **flagship species** of North American conservation campaigns.*SYN. *benchmark, leading, flagship project***Breeding** (n. — habits / season)**Reproduction animale**EX. *Unseasonal heatwaves severely disrupted the nesting and **breeding** habits of coastal terns.*SYN. *reproduction, mating, proliferation***Wetland** (n.)**Zone humide, marais**EX. *Draining the local **wetland** resulted in the rapid collapse of several endemic amphibian species.*SYN. *marsh, swamp, bog***Biological indicator** (n.)**Bioindicateur**EX. *Because of their sensitivity to pollution, lichen populations serve as a reliable **biological indicator** of air purity.*

Porous skin (n.)**Peau perméable / poreuse**EX. Pesticides leach easily through the **porous skin** of tree frogs, causing lethal physiological damage.**Susceptible to / Sensitive to** (adj.)**Vulnérable à, sensible à**EX. Alpine ecosystems are remarkably **susceptible to** even slight rises in global temperature.

SYN. vulnerable to, prone to, defenseless against

Environmental hazard (n.)**Risque environnemental**EX. The abandoned industrial plant remains an active **environmental hazard** for downstream aquifers.

SYN. ecological threat, environmental danger

Red flag (n. métaphorique)**Signal d'alarme**EX. The sudden disappearance of pollinator species was interpreted as a serious **red flag** by ecologists.

SYN. warning sign, alert, alarm bell

To alter (v.)**Modifier, altérer**EX. Intensive dam construction dramatically **alters** river ecosystems and sediment deposition.

SYN. to modify, to adjust, to amend

Poaching / Poacher (n.)**Braconnage / Braconnier**EX. Wildlife rangers deployed infrared cameras across the reserve to combat nighttime **poaching**.**Invasive species** (n.)**Espèce invasive / envahissante**EX. The Asian hornet is an aggressive **invasive species** threatening European honeybee colonies.

SYN. non-native species, alien pest

Critters (n. familier)**Bestioles, petites bêtes**EX. During the school bioblitz, children logged hundreds of soil **critters** using a mobile identification app.

SYN. small creatures, organisms

Watered-down (adj. idiomatique)**Édulcoré, trop simplifié**EX. Environmental NGOs criticized the treaty, calling it a **watered-down** compromise with no enforcement teeth.

SYN. oversimplified, diluted, weakened

4. Décrire des graphiques et des tendances (Graphs & Trends)

↗ A. La hausse (Go Up)

To rise / To increase

Augmenter

EX. Public participation rates **rose** steadily over the five-year trial period.

SYN. to climb, to lift

To soar / To rocket

Monter en flèche

EX. Submissions on the biodiversity app **soared** immediately after the national documentary aired.

SYN. to surge, to skyrocket, to take off sharply

To peak

Atteindre un sommet / pic

EX. Traffic on the citizen portal **peaked** at over 50,000 requests per minute on Earth Day.

SYN. to reach a climax, to reach the highest point

↘ B. La baisse (Go Down)

To fall / To decrease / To decline / To drop

Diminuer, chuter

EX. Pollution readings in the city center **dropped** noticeably following the new transit regulations.

To plummet

Dégringoler, s'effondrer

EX. Amphibian counts **plummeted** after toxic waste leaked into the forest creek.

SYN. to collapse, to plunge

To halve

Diminuer de moitié

EX. The error margin in volunteer observations **halved** once an automated check was integrated.

SYN. to reduce by 50%

↔ C. La stabilité & les variations

To remain steady / To stay the same

Rester stable

EX. Despite external fluctuations, the baseline error rate **remained steady** at approximately 3%.

SYN. to remain constant, to plateau

To level off

Se stabiliser (après hausse ou baisse)

EX. After three months of exponential growth, active user accounts **leveled off** at around 12,000.

To fluctuate

Varier, osciller

EX. Annual precipitation totals **fluctuated** widely throughout the twenty-year observation window.

SYN. to oscillate, to waver

To recover

Repartir à la hausse, se redresser

EX. Local bird populations **recovered** within two seasons of habitat restoration.

SYN. to bounce back, to rebound

↙ D. Adverbes de nuance (qualifier la pente)

Sharply / Dramatically / Steeply

Nettement, brutalement

EX. Carbon emissions declined **sharply** during the lockdown months.

Slightly / Marginally / Gradually

Légèrement, progressivement

EX. The average seasonal temperature increased **gradually** over the last century.

5. Citoyenneté, Médias & Citizen Journalism

Unbiased (adj.)

Impartial, neutre

EX. Statisticians must follow blind protocols to guarantee that the final evaluation remains **unbiased**.

SYN. neutral, objective, fair, impartial ≠ biased / prejudiced

Trustworthy (adj.)

Digne de confiance, fiable

EX. Cross-referencing multiple crowdsourced inputs ensures the compiled dataset is **trustworthy**.

SYN. reliable, credible, dependable

Integrity (n.)

Intégrité, honnêteté intellectuelle

EX. Manipulating sample numbers to fit a hypothesis undermines fundamental academic **integrity**.

SYN. probity, honesty, uprightness

Eye-witness (n.)

Témoin oculaire

EX. Smartphone footage uploaded by an **eye-witness** quickly disproved the official police account.

SYN. bystander, observer, on-the-scene witness

Volatile (adj.)

Instable, changeant

EX. Public sentiment on social networks is notoriously **volatile** during electoral campaigns.

SYN. unpredictable, unstable, erratic

Post-truth era (n.)

L'ère de la post-vérité

EX. In a **post-truth era**, peer-reviewed evidence frequently struggles against viral emotional narratives.

To re-invent (v.)

Réinventer, repenser un modèle

EX. Independent newsrooms must **re-invent** their investigative methods to retain public trust.

SYN. to reshape, to revolutionize

A swarm of (n. — sources)

Un essaim, une multitude

EX. Breaking news producers had to filter through **a swarm of** contradictory social media posts.

SYN. an influx, a deluge, an overflow

To be fooled (v. passif)**Se faire duper / tromper**EX. *Even trained reviewers can **be fooled** by sophisticated deepfake images.*SYN. *to be misled, to be tricked, to be deceived***6. Verbes académiques & Expressions idiomatiques****To tackle** (v. — an issue / problem)**S'attaquer à un problème**EX. *Interdisciplinary teams are required **to tackle** the complex challenge of algorithmic bias.*SYN. *to address, to confront, to grapple with, to deal with***To raise awareness** (v.)**Sensibiliser**EX. *The dashboard was designed **to raise awareness** among citizens about domestic energy waste.*SYN. *to sensitize, to alert, to draw attention to***Fine-tuning** (n. / v.)**Ajustement minutieux, mise au point**EX. *The neural network delivered solid baseline results, but the weights required further **fine-tuning**.*SYN. *calibration, subtle adjustment, refinement***All hands on deck** (idiome)**Mobilisation générale**EX. *With the project submission deadline only 48 hours away, it was **all hands on deck** in the lab.***The cherry on top** (idiome)**La cerise sur le gâteau**EX. *The paper was accepted into Nature, and receiving the top student presentation award was **the cherry on top**.***Quirky** (adj.)**Décalé, original, insolite**EX. *The app's **quirky** gamified interface motivated non-specialists to classify sound recordings daily.*SYN. *unconventional, eccentric, offbeat***To assess** (v.)**Évaluer, estimer**EX. *We used a linear regression model **to assess** the impact of household income on digital access.*SYN. *to evaluate, to appraise, to gauge***Subpar** (adj.)**En dessous de la moyenne, médiocre**EX. *Responses gathered without GPS coordinates were discarded due to their **subpar** quality.*SYN. *inferior, below average, unsatisfactory*

7. Grammaire & pièges d'examen

SPÉCIAL MIASHS

1 Singulier vs pluriel irrégulier

1 *phenomenon* → 2 **phenomena**

1 *criterion* → 2 **criteria**

EX. Scientists observed a rare atmospheric **phenomenon** yesterday, whereas several related **phenomena** had already been recorded last year.

EX. Statistical validity was the primary **criterion**, but the researchers evaluated seven distinct **criteria** in total.

2 Habitude au passé vs au présent

Used to + base verbale

Action / état passé et révolu.

Ecologists **used to record** observations manually on paper clipboards before mobile apps were introduced.

Be used to + V-ing

Être habitué à.

Our data science students **are used to cleaning** large, messy CSV files before running regressions.

3 Le mot « means » (toujours avec un -s)

Participatory mapping is **an effective means** of documenting urban green spaces.

4 Faux-amis fréquents

- **Lay people** ≠ personnes laïques (religion) ⇒ *le grand public, les profanes.*

EX. The lecture was simplified so that **lay people** without a background in statistics could follow along.

- **Sensitive** = sensible, vulnérable / **Sensible** = sensé, raisonnable.

EX. The algorithm is highly **sensitive** to missing values, so the team made the **sensible** decision to impute the missing data.
